NON-ATHLETIC CLIENTS

Have you been dealing with a “crick” in your neck which never really goes away?

Have you been told you “need” surgery but you wish to look into a less invasive natural way to relieve the muscular pain, weakness, and restriction you are experiencing?

Do you find yourself feeling frustrated with an increase in aches and pains and a decrease in your ability to perform at previous levels of not only exercise but also day to day endeavors with each new Birthday?

Call Scott Zelensky at Proactive Health Therapeutic Services.

AVA'S TESTIMONIAL

“I have been seeing a chiropractor for years because of my back, one day my doctors recommended Scott at Proactive Health Services. What a difference between the massages I have gotten in the past and Scott. Believe me when I tell you Scott knows what he is doing, he goes right into the spot and works it until it is feeling so much better. I now know the difference between a Swedish massage and therapeutic massage. There is no comparison. I have recommended Scott to many of my friends, unless you try it, you just don't know what you are missing. “

WHAT PROACTIVE HEALTH THERAPEUTIC CAN DO

Through his impeccable reputation as a Sports & Injury Massage Therapist, Scott increasingly continues to be referred to nonathletic people. They are either referred by a friend or they find him on the web. He has been able to help hundreds of people with a wide variety of muscular issues that are not involving sports. This is becoming a very rewarding part of his practice, especially when people have arrived with walkers, canes, and wheel chairs, and “walked out” without them.
