GRATUITY

I am asked all the time about gratuity. So let’s talk about it. My philosophy is that gratuity is a “gift” for exemplary service. Yes.... Gratuity is common in my field. This is especially true in Vegas.

If you come in and receive exemplary work, if I have come through for you and help you with your issues, if you feel I have performed a level of work which warrants a tip, then by all means tip what you feel appropriate. If not, then don’t. If you are a tipper, then tip. If you are not, then don’t. It’s that simple.

As to the discussion of how much.....I leave that to you and your own normal inclinations and practices. However, I will say that if you are normally a tipper and if indeed I do come through for you with the quality and expertise promised, then remember.... I did not just park your car, I Pricing and Value did not just bring your meal, I did not just carry your bags, I fixed your problem! I reduced or eliminated your pain.

I increased your range of motion, I increased your strength. I increased your performance levels. How much you “Value” this and the person who delivered it at a “Median” price is up to you and you alone.
